

Business Energy Savings Program

Beat the Heat with Evergy's HVAC Incentives

Evergy's Business Energy Savings Program can help cover the cost of investing in a more efficient HVAC unit.

Cooling season is coming up fast, and higher temperatures outside mean your older HVAC units will be working overtime. Inefficient HVAC units use a LOT of energy and that unnecessary energy results in wasted dollars that could be redirected to better uses within your business.

Benefits of Energy-Efficient HVAC Units:

- Uses 30-50% less energy
- Can last 20+ years
- Better air quality
- Typically quieter
- More environmentally friendly
- Lower maintenance cost

Upgrades Available for Incentives*:

- Air-Cooled – Single Package or Split Systems (DX Units)
- Air Source Heat Pumps (ASHP)
- Packaged Terminal Air Conditioners & Heat Pumps (PTAC & PTHP)
- HVAC Controls Optimization with or without Peak Demand Reduction

**Please view our [Standard](#) or [Custom](#) Incentive Brochures for specific rates.*

Get Started Saving!

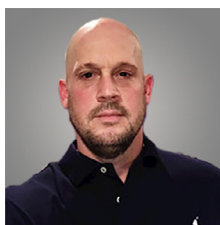

If your business is ready to upgrade to energy-efficient HVAC units, our incentives lower the cost of installation so you can reap the benefits for years to come. Reach out to one of our Business Development Representatives to hear more details, and to find out how much you could save by upgrading your HVAC unit.
